

MOHINI BAMANKAR

SOFTWARE ENGINEER | JAVA & PYTHON DEVELOPER

📞 91-9309988352 ✉️ mohinibamankar3@gmail.com 🌐 GitHub 🔗 LinkedIn

SUMMARY

I am a motivated Software Engineer with over **1.5 years of experience** in utilizing **Java** and **Python** for the development of robust software solutions. Proficient in designing scalable systems, building **REST APIs**, and delivering a seamless **full-stack development** experience. My expertise extends into **AI** and **IoT** technologies, where I strive to create innovative solutions that meet **real-world challenges**

EXPERIENCE

Software Engineer

Innovatus Technology 07/2024 - Present Pune, India

Specializes in developing IT solutions and software services

- Developed and maintained backend services using **Java** & **Spring Boot**
- Designed and implemented **REST APIs** for scalable applications
- Built responsive frontend components using **Angular**
- Managed databases using **MySQL** and cloud storage using **AWS S3**
- Improved system performance by **20%** through optimization
- Reduced API response time by **30%**

EDUCATION

B.Tech - Electronics & Telecommunication

N B Navale Sinhgad College of Engineering, Solapur

08/2019 - 06/2023 | 91.65%

CERTIFICATIONS

[Python 101 for Data Science - IBM Cognitive Class 2026](#)

Certification in Python for Data Science focusing on essential data manipulation skills and technique.

[Full Stack Java Developer - Mind script Tech, Pune 2025](#)

Certification program providing comprehensive knowledge on Full Stack Java Development

[Agile Methodology Program - Cognizant \(Forage\) 2025](#)

Program providing knowledge of Agile methodologies and practices

[AI with Python - FUEL For Nation, Pune 2024](#)

Certification focusing on the application of Artificial Intelligence with Python

TRAINING / COURSES

[Campus Leader Internship - TechLearn 2024](#)

Internship program where the individual served as a Campus Leader, gaining practical skills

LANGUAGES

English Proficient ●●●●●●●●

KEY ACHIEVEMENTS

🌐 Portfolio Website

A personal portfolio website highlighting various technical projects and skills. Architected a full-stack personal portfolio using Java and Spring Boot with an Angular frontend.

SKILLS

Java	Python	SpringBoot	REST	
IoT	GitHub	C/C++	HTML	CSS
Bootstrap	Angular	JavaScript	AWS	
S3	RDS	TensorFlow	OpenCV	
Scikit-Learn	Numpy	Pandas	Git	
OOP	Data Structures	AES		
Encryption	Agile	Deep Learning		

PROJECTS

[Steganography Data Security System](#) 🔗

01/2023 - 04/2023 Not provided

Steganography Data Security System focused on data integrity and security

- Developed a Java-based image masking system using MySQL and AES encryption to ensure 100% data integrity

[Encrypted Data Search System](#) 🔗

05/2023 - 07/2023 Not provided

A search utility designed for quick retrieval of encrypted data from cloud storage

- Engineered a cloud-native search utility on AWS S3 and RDS, reducing encrypted data retrieval latency by 25%

[AI Smart Home Automation](#) 🔗

08/2023 - 10/2023 Not provided

AI Smart Home Automation project focusing on intelligent home control

- Created a real-time IoT ecosystem using Python and Deep Learning to automate residential power management via voice control

[Electric Pole Detection System](#) 🔗

10/2023 - 12/2023 Not provided

Project focusing on deep learning technologies applied to infrastructure monitoring

- Deployed a YOLO-based deep learning model for real-time object detection, achieving high precision in identifying infrastructure anomalies
